

EXPERIENCE

Quality Engineer

Machinify

- 📅 11/2024 - 06/2026

📍 St.Louis, US (Remote)
- Addressed and improved business-technical alignment by mapping AI models to healthcare system requirements, bridging critical gaps, and enhancing communication between teams with Resilience.
 - Led AI model selection and validated product alignment with business goals, ensuring adherence to standards and user needs.
 - Conducted comprehensive tests, including functional, regression, integration, and coordinated UAT, identifying defects and collaborating with developers to reduce critical issues.
 - Designed, coordinated, consulted, implemented, integrated and applied test cases across all layers of the Test Pyramid, enhancing feature validation and increasing coverage.
 - Tracked and reported key metrics such as defect rates and test coverage on multiple projects, providing data-driven insights for continuous improvement.
 - Facilitated smooth communication and collaboration between development, QA, and business teams, mitigating risks and ensuring project success.

Software Quality Assurance Engineer

Greenlight

- 📅 07/2022 - 08/2024

📍 Atlanta, US (Remote)
- Delivered a children's financial education platform across iOS, Android, and Web, supporting over a million monthly users, maintaining cross-platform consistency.
 - Created a testing framework with acceptance, sanity, smoke, performance, load & compatibility tests. Directed QA in agile sprints, delivering 4 modules on time, zero defects, by shifting quality left.
 - Mentored and trained 5 team members to enhance testing skills, improving overall QA performance and project delivery rates.
 - Established structured test plans and strategies aligned with project objectives, leveraging analytics tools like Firebase and Google Analytics for traceability and enhancement.
 - Collaborated and participated with developers and product managers to troubleshoot and prioritize issues and streamline bug backlog management to reduce time spent on defects.
 - Evaluated, monitored and increased test coverage and effectiveness through strategic test case design and review, using risk collected mapping and analytics methods using a ticket system.

Software Quality Assurance Engineer

ThoughtWorks

- 📅 07/2020 - 08/2022

📍 Recife, Brazil
- Defined project scope and goals with stakeholders, enhancing alignment and collaboration.
 - Executed comprehensive functional tests for iOS, Android, and web platforms, ensuring broad coverage and Ecommerce product stability.
 - Created tailored test plans and strategies, adapting to project-specific needs and risks, while collaborating with developers and clients.
 - Established test accuracy by applying data-driven methodologies and developing risk analysis frameworks across 4 projects.
 - Prioritized and managed over 90 bugs monthly in scheduled ways, improving product stability.

SUMMARY

Results-driven Quality Engineer with over 14 years of experience in software quality assurance and test automation, expert in analytics-driven testing and data quality assurance. My key achievements include successfully delivering a children's financial education platform that supports over a million monthly users and enhancing defect detection rates during AI model evaluations, while also improving test coverage through strategic design across multiple projects. I am seeking a Senior Quality Engineer position at your company, where I can leverage my expertise in data management and data pipeline testing to support your mission of ensuring high-quality data and analytics in a dynamic enterprise environment.

KEY ACHIEVEMENTS

- 💎

Enhanced Analytics Implementation

Increased defect detection rate by 30% during analytics implementations for AI model evaluations.
- 💎

Improved Data Quality Assurance

Achieved improvement in test coverage by ensuring data quality assurance best practices.
- 💎

Streamlined QA Effectiveness

Reduced defect resolution time by 40% through implementing data-driven testing and analytics tools.

EDUCATION

Ph.D. Machine Learning and Big Data

EXPERIENCE

SQA Engineer

Samsung Electronics

📅 09/2011 - 10/2020 📍 Recife, Brazil

- Enhanced best practices and QA ownership as a software quality evangelist, enhancing team commitment.
- Collaborated with cross-functional teams using Design Sprint to define requirements and ensure comprehensive test coverage.
- Authored tailored test plans, strategies, and executed tests, delivering actionable reports and insights.
- Initiated risk-based analysis to prioritize QA efforts across fast-evolving product roadmaps.
- Applied ATDD, TDD, and BDD for aligned testing practices and built traceability matrices for enhanced knowledge-sharing.
- Automated functional and non-functional tests with Selenium and Appium, and enforced performance tests on Android and Windows.
- Adapted to agile and hybrid environments, leveraging methodologies like Scrum, Kanban, and CI.

SKILLS

Test Strategy, Processes, Approach and Methods

Analytics, ATDD, Automated Testing, Azure, BDD, Data-Driven Testing, Defect Tracking, E2E Testing, Escaped Defect Analysis, Kanban, Leadership, Lean, MarTech, Risk Mapping, Root Cause Analysis, RUP, Scrum, SDLC, ServiceNow, Test Case Design, Test Coverage Analysis, Test Planning, Test Pyramid, Traceability, XP, Manual Testing, Integrity, Python, Java, ETL, JUnit, TestNG, GCP, ETL Tools, Azure Data Factory, Google BigQuery, Dataflow

Test Types

Functional, Integration, Regression, Compatibility, Performance, Acceptance, Accessibility, AI Model Testing, Performance Testing, Spike Testing, Load Testing, Penetration Testing

Soft Skills

Active Listening, Adaptability, Attention to Detail, Collaboration, Critical Thinking, Cultural Awareness, Mentoring, Problem Solving, Public Speaking, Risk Management, Strong Work Ethic

TOOLS

⚙️ Performance and Load

Artillery, Jmeter, K6

⚙️ Test Automation & QA Tools

Azure DevOps, BrowserStack, Confluence, Git, Jira, Playwright, Postman, Thunder Client

⚙️ Coding and support

Playwright, JavaScript, SQL, REST API, Docker, GitLab, Jenkins, Cucumber
